

User Manual for Intimate Lubricants

Product Description

The intimate lubricants are specifically designed to alleviate vaginal dryness, support the body's natural lubrication, and enhance natural glide. They are suitable for both vaginal and anal use and contribute to increased comfort during intimate intercourse. The lubricants can be used daily and are compatible with condoms.

Vaginal Use

The intimate lubricants support the natural glide of the vagina by increasing moisture and reducing friction during intercourse. They are suitable for all sexually active individuals (women/men/diverse) and provide a more pleasant sensation during sexual activity.

Application:

1. Dispense the desired amount of lubricant.
2. Apply the gel to the outer skin of the penis or vagina.
3. When using with a condom: Apply the lubricant to the already donned condom.
4. Repeat as needed. The product can be reapplied multiple times during intercourse.

Anal Use

The intimate lubricant reduces friction and helps prevent anal fissures. It minimizes the risk of condom breakage and ensures smoother glide in the anal area. It can be used by all genders for anal application as well.

Application:

1. Apply a small amount of lubricant to the anus and/or penis.
2. When using with condoms: Apply the lubricant to the donned condom.
3. For silicone-based lubricants, it is recommended to start with a smaller amount, as the product is very effective.

Warnings and Safety Precautions:

- Avoid contact with eyes: If the gel gets into the eyes, rinse immediately with water.
- Do not apply to irritated skin: If skin irritation or allergic reactions occur, discontinue use immediately and consult a doctor.
- For external use only: The lubricant is not intended for oral ingestion or as a contraceptive.

- Keep out of reach of children: Store the product securely to prevent unauthorized access.
- Not a spermicide: The product does not provide protection against pregnancy or sexually transmitted infections.
- Slip hazard: The gel may pose a slipping hazard on smooth surfaces (e.g., tiles). Avoid contact with such surfaces and wipe up spills immediately.
- Test for compatibility: Before the first use, test a small amount on the skin to rule out allergic reactions.

Storage:

Store the intimate lubricant in a cool, dry place. Do not expose the product to direct sunlight.

Note: This product is intended solely to enhance comfort during intercourse and does not provide protection against unwanted pregnancies or sexually transmitted diseases.
