

User Manual for Silicone or Metal Cock Ring

Congratulations on your new cock ring!

This high-quality ring is designed to enhance your sexual pleasure and improve stamina. Please read this manual carefully to ensure maximum safety and enjoyment.

1. Product Description

A cock ring, also known as a penis ring, is worn around the penis and/or testicles. It restricts blood flow, resulting in a more intense and prolonged erection. Our cock rings are made from either skin-friendly silicone or high-quality metal, both of which are safe and durable materials.

2. Application Guide

Step-by-Step Instructions:

1. Preparation:

Ensure that the cock ring is clean and free from damage. Use water-based lubricant if necessary, especially for silicone rings, to make application easier.

2. Applying the Cock Ring:

- The penis should be semi-erect or fully erect.
- Gently slide the ring over the penis and position it at the base of the shaft.
- Alternatively, you can position the ring behind the testicles to distribute pressure and provide additional stimulation.

3. Duration of Use:

Do not wear the cock ring for more than 20-30 minutes at a time to avoid circulation issues. Take breaks between uses to prevent potential risks.

4. Removal:

Carefully remove the ring after use by slowly rolling or pulling it off. If using a metal ring, be extra cautious to avoid skin irritation.

3. Cleaning and Maintenance

- **Silicone Ring:** Clean thoroughly with warm water and mild soap after each use. Let it air dry completely.
- **Metal Ring:** Use lukewarm water and a gentle cleaning solution. Ensure the ring is fully dried to prevent rust.

Note: Store your cock ring in a clean, dry place. Avoid direct sunlight and extreme temperatures, as they can damage the material.

4. Safety Information and Warnings

Important Safety Precautions:

- **Avoid Over-Tightening:** Ensure the cock ring is not too tight to prevent blood clots or nerve irritation. If you feel pain, numbness, or notice discoloration, remove the ring immediately.
- **Maximum Wear Time:** Do not exceed the recommended 30-minute wear time. Prolonged use can lead to serious health risks such as tissue damage or long-term erectile issues.
- **Correct Size:** Always use the appropriate ring size. A ring that is too small can be uncomfortable or dangerous.
- **Caution with Metal Rings:** Due to the rigidity of metal rings, extra care is required during use. These should only be used by experienced individuals.
- **Health Conditions:** Do not use a cock ring if you have blood disorders, diabetes, or heart problems unless explicitly approved by your doctor.
- **Do Not Wear While Sleeping:** Avoid using the cock ring during sleep, as this can reduce blood circulation.

Allergies and Skin Reactions:

- **Silicone:** Individuals with a silicone allergy should not use this product.
- **Metal:** Some people may experience sensitivities to certain metals. If you develop skin irritation, discontinue use and consult a doctor.

5. Disclaimer

This product is intended solely for sexual stimulation and is not a medical device. Use the cock ring responsibly. The manufacturer assumes no liability for any damage or injury resulting from improper use.

Enjoy and use responsibly!
