

## User Manual for the Use of a Silicone Dildo

Please read this manual carefully before using the product.

### Contents

1. Introduction
2. First Use
3. Usage
4. Cleaning and Care
5. Warnings
6. Safe Use
7. Disposal
8. Safety Information

### 1. Introduction

A silicone dildo is a sex toy designed for stimulation and pleasure. Made from high-quality, body-safe silicone, it is safe for the skin and highly hygienic when properly maintained.

### 2. First Use

1. **Cleaning:** Before first use, thoroughly clean the dildo with warm water and mild antibacterial soap or a dedicated toy cleaner.
2. **Inspection:** Check the dildo for any damage or irregularities. Do not use it if you notice cracks, discoloration, or unpleasant odors.

### 3. Usage

1. **Preparation:** Use plenty of water-based lubricant to ensure comfortable insertion. Silicone-based lubricants can damage the material.
2. **Insertion:** Insert the dildo slowly and gently to achieve the desired stimulation. Always be mindful of your body's reactions and stop if you feel any pain or discomfort.
3. **Versatility:** The dildo can be used both vaginally and anally, depending on the model and personal preference. If used anally, ensure thorough cleaning before using it vaginally to avoid infections.

### 4. Cleaning and Care

1. **After Use:** Clean the dildo immediately after each use with warm water and mild soap or a specialized toy cleaner.

2. **Drying:** Allow the dildo to air dry or gently pat it dry with a clean cloth.
3. **Storage:** Store the dildo in a cool, dry place, away from direct sunlight. Keep it in a separate pouch or box to avoid contact with other toys.

## 5. Warnings

- Do not use the dildo on open wounds, inflamed areas, or irritated skin.
- Do not share the dildo with others unless used with a condom.
- Do not use the dildo if you are allergic to silicone.
- Avoid sharp objects that could damage the material.

## 6. Safe Use

- Always use sufficient lubricant to reduce friction.
- Never use the dildo under pressure or force. Focus on comfort and enjoyment.
- For anal use, ensure the toy has a wide base or suction cup to prevent full insertion.

## 7. Disposal

Do not dispose of the dildo in household waste. If possible, recycle it. Many cities offer special disposal services for silicone products. If recycling is not possible, securely package the dildo and dispose of it in general waste.

## 8. Safety Information

- Silicone is hypoallergenic, latex-free, and body-safe. When cleaned and cared for properly, it remains hygienic and in good condition for a long time.
- Avoid contact with harsh chemicals, sharp objects, and direct heat to prolong the product's life.
- If you experience skin irritation or other health issues related to use, stop immediately and consult a physician if necessary.

This manual is intended to help you use your product safely and responsibly for maximum pleasure. Always be mindful of your personal limits.

If you have any further questions, our customer service is happy to assist you. Enjoy your product and have a safe experience,

**Your Toylie Team!**
