

User Manual - Toylie Penis Sleeve

IMPORTANT!

- Do not expose your latex product to direct sunlight or heat for extended periods.
- Avoid contact between latex and metal (e.g., zippers) to prevent discoloration.
- While latex is highly stretchable, it can be damaged by sharp objects such as long fingernails or jewelry.

Putting On and Taking Off

1. Preparation:

- Always treat the inside of the penis sleeve with silicone oil or a suitable lubricant before putting it on. This makes it easier to put on and prevents air pockets.

2. Putting On:

- Slide the sleeve over the erect penis through the opening.
- Gently press out any air pockets.
- Stretch the entry to package the testicles.

3. Taking Off:

- Stretch the entry to unpack the testicles, then carefully slide the sleeve off the penis.
- Important: Practice putting on and taking off the sleeve. Don't get frustrated if it doesn't work perfectly the first time. Always handle it carefully to avoid pinching!

Cleaning and Care

- **Cleaning:** Clean latex products with clear, lukewarm water without using detergent. A special latex detergent may be used.
- **Drying:** Dry the product with a soft cloth, then let it dry completely.
- **Care:** Maintain the Toylie penis sleeve with talcum powder or silicone oil and store it in a dark, dry place.

Note

This product is made from natural rubber latex, which may cause allergic reactions. If you experience any physical symptoms or health issues, please seek medical attention immediately.

This manual explains how to safely and comfortably use your Toylie penis sleeve and ensures a long lifespan for the product.
